

## Repairs for Legacy Mini /NE Health Physics and Radiological Instruments by Phoenix Dosimetry

Phoenix Dosimetry are now pleased to offer a repair service for Mini Instruments and NE Legacy equipment including all NE Farmer Chambers and Radiological equipment.

Ken Bosley, who has a wealth of experience in the NE equipment, is ideally placed at Phoenix Dosimetry for these types of repairs. The products covered include all the Mini and Legacy NE/Thermo equipment, the only limiting factor may be the availability of parts but in the majority of cases we can normally effect repairs.

**The range includes the list below but is not exclusive to the these units:**

- Dose Rate Monitors: 900 series
- 900 Series GM tube and scintillation detector based contamination monitor
- 2100 series ion chamber survey meters
- 7-10 Mini alarm with MC10, MC20 and MC70 probes
- Monitors by NE including Electra's, PCM's and PDR's and RM5

- 1000 series type R, RL and CM11's HM9' and associated equipment
- NE Radiological Farmer Electrometers, Dosecheckers, Farmer Chambers (new and rebuilds)

Please contact us as we offer a free no obligation inspection service which is followed up by a report and a no obligation quotation prior to any works commencing. Should you decide not to proceed then we will simply return the instruments OR dispose of them as requested.
