

New LINK 2 RADSIGHT LIVE System for real time dose display

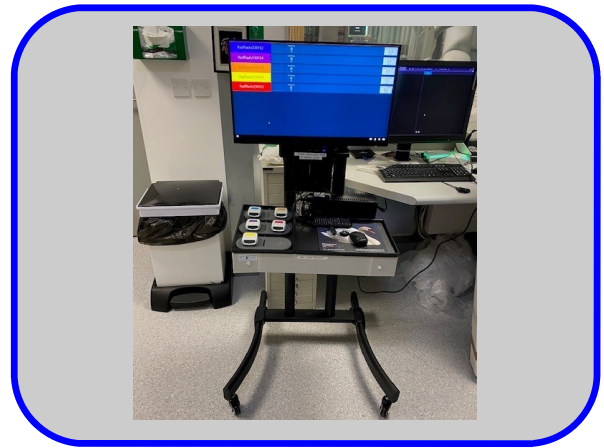

The new **Link 2 RADSIGHT LIVE** system provides a cost effective solution for your real time personal dose monitoring requirements.

The new Link 2 enables a team of workers wearing RadFlash electronic personal dosimeters to be monitored and their doses displayed in Realtime on a large HDMI compatible monitor.

The system comprises the small hand size Link 2 module, shown below centre, linked directly to the monitor and no PC is required.

A keyboard and mouse can be attached to issue and return dosimeters and also reset them back to zero.

Alarms for dose and doserate are user set and the colour coding on dosimeters means that units do not have to be issued to people but can be simply picked up and used with minimum set up from the dosimeter can be transmitted using an integral Bluetooth radio module with integrated reporting and management capability via the Radsight software.

Key Features:

- Gamma BT enabled dosimeter
- Displays H*10 Dose and Doserate
- Independent Dose / Dose rate alarms
- Standard AA Battery (also Lithium versions)
- Wireless charging
- LED, Sounder
- Fully type tested
- Full dose history display with download

Applications:

1. Training tool
2. Interventional radiology rooms
3. Cath labs
